PROFESSIONAL SUMMARY

Software Developer with an Electronics and Communication Engineering background and hands-on experience in Java, JavaScript, Angular, React.js, Spring Boot, and MySQL. Experienced in developing responsive web applications, REST APIs, and database-driven systems through academic and team projects, with a strong foundation in core electronics and hardware-software integration. Seeking an entry-level Software Developer role to apply technical and problem-solving skills while leveraging a strong foundation in both software and electronics.

TECHNICAL SKILLS

Programming: Java, JavaScript, C++, SQL
Frontend: React.js, Angular, HTML5, CSS3
Backend: Spring Boot, Node.js, Express.js, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub, Agile Development, Arduino, Microcontroller Interfacing

Core Electronics & Embedded: Basic analog and digital electronics, Microcontroller basics, Basic circuit understanding, Hardware interfacing fundamentals

EDUCATION

B.E. Electronics & Communication Engineering — *2022 - 2026*
Sri Krishna College of Technology, Coimbatore | CGPA: 8.00 / 10.0

Higher Secondary Certificate (12th) — *2022*
The TVS School, Madurai | 74.66%

Secondary School Certificate (10th) — *2020*
S.B.O.A. Matriculation & Higher Secondary School, Madurai | 81.40%

INTERNSHIPS

Cognizant Technology Solutions – Software Engineering Intern — *March - June 2026*

- Completed full stack development training in Java, Angular, Spring Boot and MySQL.
- Built front end and back-end application components using Angular, Spring Boot and REST APIs.
- Applied Agile development practices and problem-solving skills to build and debug applications.

NLC India Limited - Telecommunications Intern — *June - July 2024*

- Studied telecommunication systems and network infrastructure, and assisted with network monitoring and system optimization.

SALZER Electronic - Engineering Intern — *May 2025*

- Worked with the engineering team on product development projects and studied manufacturing and automation systems.

KEY PROJECTS

ExamPlanner – Digital Exam Scheduling & Administration System — *Solo Project*

Java, Spring Boot, Angular, MySQL

- Developed a web-based exam management system covering student registration, course mapping, exam scheduling and hall allocation.
- Implemented automated seating and invigilator allocation using Spring Boot REST APIs, an Angular front end and a MySQL database.
- GitHub - Link

SkySage - Weather Information Platform — *Team Project*

React.js, API Integration, Responsive Design

- Built a responsive weather web application that displays real-time data from third-party weather APIs.
- Integrated external REST APIs into a React.js interface that works across desktop and mobile screens.

GitHub-Link

Smart Vehicle Logging System (SVLS) — *Team Project*

Embedded C, Microcontroller, Hardware Interfacing

- Developed an embedded system for automated vehicle identification and real-time logging at checkpoints.
- Integrated hardware and software for data capture and structured storage of vehicle records.
